

# FORCESIGHT™

## THE ULTIMATE WEAPON FOR INFORMATION-BASED POLICING

Bishop Rock Software's ForceSIGHT is the result of an R&D collaboration between a diverse and experienced group of law enforcement leaders from across the US combined with **extraordinary analytical technology** twenty years ahead of any similar

product in the law enforcement software market. It puts relevant intelligence, both strategic and tactical, at the fingertips of everyone from the chief of police to the beat cop.

### INFORMATION FUSION: THE KEY TO MORE EFFECTIVE CRIMEFIGHTING WITH FEWER RESOURCES

ForceSIGHT allows agencies to **tailor their deployment strategies** to match exact time and place workloads imposed by different types of crime in each beat. ForceSIGHT closes the loop between insight, action, and assessment by **integrating operations management** directly into the analytical platform. It promotes **accountability** by setting benchmarks and tracking individual officer performance. Finally, it links together all of the isolated data silos that agencies are creating as they deploy more and more advanced technologies.

When you deploy ForceSIGHT, statistics and geospatial intelligence are no longer two separate disciplines that require specialized crime analyst/technicians to master—these easy-to-use tools are placed **directly into the hands of the crimefighters** who can most effectively use them.

### MANAGE RISK WHILE CONTINUOUSLY IMPROVING POLICIES AND TRAINING

Many law enforcement agencies today are looking for ways to effectively **manage risk**, in order to promote officer and citizen safety and minimize litigation

risk. ForceSIGHT contributes to an **early intervention system** by identifying possible problem officer behaviors based on triggering rules, enforcing agency policies during operations planning, and establishing standard process metrics for investigations such as turnaround times. Each incident is fed back into training programs and policies so that the organization learns and improves from each incident.

**BEYOND COMPSTAT**

ForceSIGHT is the first integrated software system that enables an agency to fulfill all of the Compstat principles simultaneously:

- ✓ Accurate, timely intelligence
- ✓ Rapid Deployment
- ✓ Effective Tactics
- ✓ Relentless Followup & Assessment

We deliver intelligence with unprecedented speed and detail. We give you the intelligence to make rapid, proactive deployment decisions. We ensure effective tactics both by enforcing policy compliance and by tracking the performance of tactics to real metrics. Finally, we empower commanders to relentlessly track and follow up on problems by giving them instantaneous access to information.

**21ST CENTURY  
INTEGRATED  
CRIMEFIGHTING**

Bishop Rock Software is transforming the way law enforcement agencies are managed, improving efficiency, fighting crime, and ultimately improving the quality of life in communities across the world. ForceSIGHT is an Integrated 21<sup>st</sup> Century Crimefighting platform for agencies that need to fight crime, manage risk, and make the most impact possible with limited resources.
